Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/534,834	Applicant(s) BRODIN, PETER	
	Examiner Karl D. Frech	Art Unit 2887	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's preliminary amendment filed 5/13/05 has been entered.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marcus 6,354,494 in view of Baratelli 6,325,285. Marcus discloses an identification card. It is disclosed in col 3 line 66- col 4 line 3 that a person is scanned to produce a signal representative of an image of the person; col 4 line 3 discloses the signal is converted into a digital representation; col 4 lines 42-49 disclose that the digital image is converted to a PDF 417 bar code; col 4 line 50-54 disclose that this bar coded digital representation of the person is printed on the card; col 4 line 60-65 discloses that the persons image is also printed on the card. Although not specifically disclosed that Marcus images/digitizes a retinal scan, Marcus does contemplate retinal scans in col 1 lines 50-55. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include a retinal scan on the card of Marcus. As disclosed by Marcus, this would be advantageous in areas of high security. Marcus does not disclose the fingerprint scan. Although Marcus does contemplate the fingerprint scan in col 1 line 50-55, Baratelli 6,325,285 discloses a fingerprint scan in a security card. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include a fingerprint scan on the card of Marcus. Again, as disclosed by Marcus, this would be advantageous in areas of high security.
